PROFILE SUMMARY

Lead Software Engineer with **6 years 10 months** of experience building high-performance, scalable web and mobile applications with **React.js, Next.js, TypeScript, Redux and React Native**, plus hands-on **Node.js/Express** API development. Delivered enterprise products for **HUB International** (Virtusa) and **Paytm** (Techlious Network). Strong in SSR, Core Web Vitals, performance optimization and GraphQL/REST API integration. Promoted to Lead for code-review rigor, mentoring and owning end-to-end delivery in Agile/Scrum teams.

TECHNICAL SKILLS

Frontend: React.js, Next.js (SSR/SSG), TypeScript, JavaScript (ES6+), Redux, React Native, HTML5, CSS3, Chakra UI, Ant Design

APIs & Backend: GraphQL (3 yrs), REST APIs, Axios, Node.js, Express, Prisma, PostgreSQL

Performance: Core Web Vitals, Code Splitting, Lazy Loading, Debouncing, Web Accessibility (a11y)

CMS: Sitecore SXA

Testing & Quality: Jest, React Testing Library, SonarQube, Postman

DevOps & Tools: Jenkins CI/CD, AWS, Vercel, Git, AI-assisted development, Agile/Scrum

PROFESSIONAL EXPERIENCE

Lead Software Engineer — Virtusa **Jun 2022 – Present**
Client: HUB International *Gurugram*

- Lead frontend development and UI maintenance for the flagship **hubinternational.com** and subsidiary portals (hubfinancial.com, fnainsurance.com, programbrokerage.com, wghealthspecialty.com).
- Architected and shipped the complete live frontend for **Western Growers (wghealthspecialty.com)**, turning complex designs into reusable, scalable Sitecore SXA components.
- Built **signature.hubinternational.com**, an internal portal used by thousands of HUB staff to generate customized, multi-variant corporate email signatures.
- Integrated UI with Sitecore CMS and GraphQL APIs alongside backend engineers, ensuring clean data hydration, component reuse and fast page loads.
- Improved performance through SSR, code splitting and Core Web Vitals tuning; ensured cross-browser and accessibility compliance.
- Promoted to Lead: drive code reviews, unblock technical issues, mentor junior developers and coordinate sprint delivery with QA and backend teams.

Software Engineer — Techlious Network **Jan 2020 – Jun 2022**

Client: Paytm — Onboarding Engine Platform

- Core contributor to a multi-vertical dashboard configuring onboarding workflows across Insurance, Finance, Learning and E-Commerce.
- Delivered B2B and agent onboarding flows used by **3,000+** Key Asset Managers and Quality Control agents.
- Built and tested REST APIs (Node.js, Postman) with request validation and business logic; integrated them via Axios with centralized error handling and loading states.
- Improved responsiveness by optimizing JS execution and debouncing search inputs; maintained high unit-test coverage and passed SonarQube gates before Jenkins CI/CD releases.
- Led technical discussions, conducted peer code reviews and owned features end to end.

Client: Invictus Survival Science — Logistics Platform

- Architected a logistics web dashboard from scratch and a companion **React Native** driver app tracking delivery fleets for clients such as Flipkart, Amazon and Coca-Cola.
- Integrated Google Maps APIs for live tracking; built a JSON-driven Form Builder for custom inspection reports; used Redux and Chakra UI.

Internal Product — Tattoo Management CRM

- Built a CRM with staff appointment calendars, client tracking and real-time revenue dashboards using React.js, TypeScript and Ant Design.

PROJECTS

Yatri Adventure — Travel Agency Platform (yatriadventure.in) **Jan 2026 – Present**

- Built end to end with Next.js, Prisma and PostgreSQL: dynamic travel packages with slug-based detail pages, separate public and admin route groups, and REST API endpoints.

Inmedic — Freelance, Korean Startup (inmedic.co.kr) **Oct 2021 – Apr 2022**

- Built the React Native app UI with multi-language support (react-i18next) and auth forms; built the company website from scratch with Next.js.

EDUCATION

B.Tech, Computer Science and Engineering — Lovely Professional University, Jalandhar | 2018 – 2022
CGPA: 8.22/10
