PROFESSIONAL SUMMARY

Lead Software Engineer with 6+ years of experience designing and building scalable web and mobile applications end to end. Builds responsive front ends with React, Next.js and TypeScript, and backend services with Node.js and Express, including REST API design, data modeling and integrations backed by PostgreSQL and MongoDB. Delivered enterprise products for HUB International and Paytm, owning features from UI to API and database. Mentored junior developers through code reviews and uses AI-assisted tools (Claude Code, GitHub Copilot, Cursor, ChatGPT, Gemini) to accelerate delivery without compromising quality.

CORE COMPETENCIES

Web/Application Development: React/Next.js frontends, Node.js/Express APIs, MySQL, PostgreSQL, MongoDB, AWS (Amplify, S3, EC2), CI/CD

Frontend Architecture: SPA, SSR, component design systems, Sitecore SXA, CMS-driven UI

State & Data: Redux Toolkit, Zustand, Context API, REST APIs (Axios interceptors), GraphQL

Performance: Code-splitting, lazy loading, debouncing/throttling, Core Web Vitals, Web Accessibility

Leadership: Agile/Scrum, code reviews, technical mentorship, cross-functional collaboration

AI-Assisted Development: Claude Code, GitHub Copilot, Cursor, ChatGPT, Gemini, prompt engineering for UI workflows

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3/SCSS, Java

Frameworks & Libraries: React.js, Next.js, React Native, Node.js, Express.js, MERN

Backend & Databases: Node.js, Express.js, REST APIs, GraphQL, PostgreSQL, Neon (serverless Postgres), MongoDB, MySQL, Prisma ORM, AWS DynamoDB (basic), Sitecore

UI Frameworks: Tailwind CSS, Material UI, Chakra UI, Ant Design, Bootstrap

Tools, Testing & DevOps: Git (GitHub/Bitbucket), Jenkins (CI/CD), SonarQube, Jest, React Testing Library (RTL), AWS (Amplify, S3, EC2), Netlify, Cloudinary, Twilio, JIRA, Postman, Figma, Zeplin

PROFESSIONAL EXPERIENCE

Lead Software Engineer | Virtusa July 2022 – Oct 2026

Lead Software Engineer (Jan 2026 – Oct 2026) · Senior Software Engineer (July 2022 – Dec 2025)

Client: HUB International

- Led frontend development and maintenance for hubinternational.com and major subsidiary portals.
- Spearheaded the end-to-end migration of HUB's legacy Angular signature web app to React, significantly improving performance and maintainability.
- Built and shipped the complete live frontend for Western Growers, converting complex UI designs into scalable Sitecore SXA components.
- Developed Sitecore SXA components used by thousands of HUB International clients across Canada.
- Built high-performance enterprise UIs, working with backend teams on API contracts and data flow for reliable data hydration and fast page loads for a high-traffic international user base.
- Drove sprint goals and UI/UX consistency, partnering with QA and backend engineers to resolve complex cross-browser defects.
- Promoted from Senior to Lead Engineer; upskilled junior developers through rigorous code reviews and by unblocking technical roadblocks.
- Integrated AI coding tools (Claude Code, GitHub Copilot, Cursor, ChatGPT) into daily workflows to accelerate UI component delivery.
- Built reusable, well-tested UI components with consistent handling of API loading, error and validation states across modules.
- Improved page speed through code-splitting, lazy loading and fewer redundant API calls; wrote unit tests with Jest and React Testing Library to keep releases stable.

- Owned features from development and testing through deployment and post-release support.

Software Engineer (Frontend) | Techlious Network Jan 2020 – June 2022

Client: Paytm Sep 2021 – June 2022

- Core contributor to the Onboarding Engine Platform: a dynamic, multi-vertical dashboard for configuring workflows across Insurance, Finance, Learning and E-Commerce.
- Delivered the B2B and agent onboarding experience used by 3,000+ Key Asset Managers (KAM) and Quality Control (QC) agents.
- Optimized JavaScript execution and applied debouncing to search inputs to improve responsiveness.
- Integrated secure REST APIs via Axios and wrote unit tests to maintain high coverage; passed SonarQube quality gates before Jenkins CI/CD deployments.
- Led technical discussions, conducted peer code reviews, and owned end-to-end feature delivery.
- Built and tested REST APIs with Postman and integrated them across backend and frontend, including request validation and business logic.
- Managed state and data flow across a multi-vertical dashboard, with centralized API error handling and clear loading states for users.

Client: Invictus Survival Science Dec 2020 – Aug 2021

- Architected a logistics web dashboard from scratch and built a companion React Native driver app tracking delivery fleets for clients including Flipkart, Amazon and Coca-Cola.
- Integrated Google Maps APIs for live telemetry tracking in the mobile app.
- Built a dynamic JSON-driven Form Builder that lets enterprise clients generate customized inspection reports.
- Managed state with Redux and styled the UI with Chakra UI.

Internal Product: Tattoo Management CRM

- Built a CRM with staff appointment calendars, client tracking and real-time revenue analytics dashboards using React.js, TypeScript and Ant Design.
- Integrated third-party calendar libraries for booking flows and backend APIs for live dashboard data.

PROJECTS

Yatri Adventure – Travel Agency Platform | Personal Project yatriadventure.in | Code

Next.js (App Router), TypeScript, PostgreSQL (Neon), Prisma ORM, Tailwind CSS

- Built a travel-agency website from scratch, owning architecture, frontend, database design and backend API implementation.
- Designed a Prisma/PostgreSQL schema, hosted on Neon serverless Postgres, so travel packages are managed dynamically instead of hardcoded, with unique slugs powering package detail pages.
- Structured the app with separate route groups for the public site and admin area, and reusable modules separating data access from business logic.
- Delivered responsive package listing and detail pages, REST API endpoints and the initial admin dashboard for managing package content.

ACHIEVEMENTS & CERTIFICATIONS

- **Stack Overflow:** high-reputation contributor answering React and frontend architecture questions, reaching 396K+ developers.
- **Promotion:** Senior to Lead Software Engineer for technical leadership, code review quality and mentoring.
- **Certifications:**
  - Data Structures and Algorithms – GeeksforGeeks
  - The Complete Web Development Bootcamp (React/Node/MERN) – Udemy
  - Google Technical Support Fundamentals – Google (Coursera)
  - Java Programming – upGrad

EDUCATION

B.Tech, Computer Science & Engineering | Lovely Professional University, Punjab 2022 | CGPA 8.22
